

```
redi::basic_opstream  
::open
```

```
graph LR; A[redi::basic_opstream::open] --> B[redi::pstream_common< CharT, std::char_traits< CharT > >::do_open];
```

A diagram illustrating a function call. On the left, a gray rectangular box contains the text `redi::basic_opstream::open`. A blue arrow points from the right side of this box to the right side of a white rectangular box on the right. The white box contains the text `redi::pstream_common< CharT, std::char_traits< CharT > >::do_open`.

```
redi::pstream_common  
< CharT, std::char_traits  
< CharT > >::do_open
```
